POST-HARVEST COMBINE MAINTENANCE CHECKLIST

Inspection Item	Note	Good	Repair	Replace	NA
Consult operators manual for post-harvest maintenance and check point		■	■	■	■
Conduct a quick look over of the machine and develop a to-do list		■	■	■	■
Only wash the outside, trying to keep water off bearings and other moving parts.		■	■	■	■
Maybe take time to touch up scratches and worn areas with paint		■	■	■	■
Open inspection plates and look over components		■	■	■	■
Open concaves and sieves and look over for any issues		■	■	■	■
Check bearings for any corrosion, spun on a shaft		■	■	■	■
Change oil and filters while lubricating all grease fittings		■	■	■	■
Check all lights and make sure they are functioning properly		■	■	■	■
Check and tighten all belts while inspecting for any cracks and dry rot symptoms.		■	■	■	■
Check feeder house chains and elevator chains for proper tightness and wear.		■	■	■	■
Look over the feeder house paneling especially the floor for excessive wear.		■	■	■	■
Check fountain and unloading augers for damage and any wear.		■	■	■	■
Grease all fittings and lubricate chains and other maintenance points outlined in the operator's manual		■	■	■	■
Fill with fuel and consider adding a fuel stabilizer for winter storage.		■	■	■	■
